1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Stover on Jan. 28, 2004.

The application has been amended as follows: In claim 20, line 2, after "reacting" please insert "endo-".

2. The following is an examiner's statement of reasons for allowance: Support for the amendment can be found on page 23 of the specification. This amendment clarifies that there is an inherent difference between the prior art product and process and the product and process of claims 20 and 25. One must use a POSS reactant having endostereochemistry to expand the POSS rings and perform the claimed process. This is different from the prior art in which the POSS selection results in a linear crosslinked POSS. With this amendment, applicants have established the critical difference in the claimed process and the prior art. There is nothing in the prior art that suggests the process as presently claimed, or provides the skilled artisan with any expectation that the resulting product (claim 25) will inherently be produced by the prior art process. As such claims 20, 21 and 25 are now in condition for allowance. The remaining claims have already been indicated as being allowed or allowable. Thus claims 1 to 18 and 20 to 29 are currently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
